

Product Overview of Concept PMC

Based on well-founded scientific research and development, Concept PMC has been established as a perfectly safe and high-tech method for cosmetic treatment.

The Kryo-method

Advantages of the Kryo-liner:

- Prevents micro-injuries to the skin and reduces swelling
- Causes vascular constriction, which prevents blood drops and lymph fluid to rise
- Almost eliminates the need for local anaesthetics like creams or solutions
- Precise colouring through exact pigmenting
- Equipped with a unique icing technique, which allows for an almost pain-free treatment
- Produces clear lines due to less swelling and better preliminary drawings

PMC Colour Ingredients

Liquid:

Mixture of isopropyl alcohol, physiological saline and glycerine
Meets US (USP) and German (DAB) pharmacopoeia requirements

Pigments:

Blend of iron oxide pigments, titanium dioxide pigment and special pigments
Quality and purity meets European regulations for dyeing substances
Consist of fine and pure pigments

Preservative:

Benzoic acid according to German regulations on cosmetics products

Tested

Observations:

- Precise application with the needle
- Excellent shade intensity (high brilliance) due to the fine-grained and highly dispersed pigments
- Absolutely zero skin reactions
- No negative observation several days after application
- Evaluation done by the independent Swiss RCC institute proves product is non-toxic

Guarantee of Quality

We guarantee that only the named approved ingredients in the respective products are used. Each batch is tested for microbial contamination by the institute BAV in Offenburg to ensure it meets our standard of quality.

Permanent Make-Up Equipment

PMC – Kryoliner

State of the art high quality digital pigmentation unit. Exclusively to LCN equipped with a unique cooling device, which allows for treatment without using local anaesthetics. Swelling and irritation of treated skin is reduced due to the cooling mechanism. Includes Applicator pigmenting pen Hand Module, Foot Pedal and cable, Hygiene Modules 1 each #1, #3, #5.

1010-14036
