

**LCN AFO System (ALL-FOR-ONE)**

A slightly acidic UV-Gel System for Problem Nails and Nails tending towards liftings.

---

## **LCN AFO System (ALL-FOR-ONE)**

The innovative ALL-FOR-ONE (AFO) texture of this high-performance Gel-System offers perfect results for all nails that tend towards extreme liftings. The ALL-FOR-ONE System consists of 3 products:

- AFO – Nail Foundation
- AFO – Bonding Gel
- AFO – Building Gel

For best results we recommend to use these products according to the recommendation for use (see below). All products of the AFO-System are compatible with all LCN light curing resins.

### **Product recommendation / Use**

- For clients with oily nails and nails that tend towards liftings
- For “switch-over” clients, clients changing from Acrylic to Gel
- Suitable for full sets and refills
- Artificial nails with a medium build-up and normal length

### **Product description**

#### **AFO – Nail Foundation**

AFO Nail Foundation is air drying and offers as a bonding enhancer a perfect base for subsequent steps. AFO Nail Foundation is slightly acidic.

#### **AFO – Bonding Gel**

Liftings are virtually impossible with the AFO Bonding Gel. This extremely strong UV-Bonding agent is easy to work with and is slightly acidic.

#### **AFO – Building Gel**

AFO Building Gel is an acid free sculpting gel with very good bonding properties. It is self levelling. It provides an even surface which is extremely easy to file. Its consistency is slightly pasty and is good for sculpting. In addition the AFO Building Gel has a good

elasticity, a high break resistance and offers a high wearing comfort.

SCULPTING PROPERTIES: firm consistency

EFFECT: very good bonding properties; stable sculpting

CHARACTERISTICS: completely self levelling during application

All products of the AFO System are compatible with all LCN UV-Gels.

---

### **Ingredients and effect**

#### **AFO Nail Foundation:**

MEK, Bis Phosphate, Pentaerythrityl Triacrylate, Methacrylic Acid, Ethyl Trimethylbenzoyl Phenylphosphinate, p-Hydroxyanisole, CI 60725

#### **AFO Bonding Gel:**

Urethane Acrylate, Methacrylic Acid, Trimethylolpropane Triacrylate, Tripropylene Glycol Diacrylate, Hydroxypropyl Methacrylate, Pentaerythrityl Triacrylate, Ethyl Trimethylbenzoyl Phenylphosphinate, Methyl Benzoylformate, Benzaldehyde, Benzoic Acid, p-Hydroxyanisole, CI 60725

#### **AFO Building Gel:**

Urethane Acrylate, Trimethylolpropane Trimethacrylate, Epoxy Methacrylate, Aliphatic Difunctional Urethane Acrylate, Hydroxypropyl Methacrylate, Bis Phosphate, Triethylene Glycol Dimethacrylate, Silica Dimethyl Silylate, Tripropylene Glycol Diacrylate, Methyl Benzoylformate, Benzaldehyde, Benzoic Acid, p-Hydroxyanisole, CI 60725

**Methacrylate acid:** The AFO-System is especially suitable for problem nails, nails tending towards liftings and switch-overs from Acrylic to Gel, based on the proportion of methacrylate acid contained in the AFO Nail Foundation and the AFO Bonding Gel.

### **Application**

1. Slightly buff natural nails and degrease with Cleaner. We recommend Cleaner extra dry for extremely oily nails.
2. Apply AFO Nail Foundation onto nails and leave to dry on the air.

3. Apply a thin layer of AFO Bonding Gel onto nails and cure for two minutes in a UV-Light unit or one minute in a LED-unit.
4. Apply and sculpt a layer of AFO Building Gel onto nails. Cure this layer as well.
5. Remove the dispersion layer with Cleaner.
6. File nails into shape and remove file dust with a nail brush.
7. Seal nails with a LCN Sealant of your choice.
8. As a finish remove the dispersion layer with Super Shine Finish Cleaner.

**Professional Tip:**

For best adhesion results cure AFO Nail Foundation after application and after solvents have been evaporated in a UV-light unit.

**Sales arguments**

- A System for problem nails and nails that tend towards liftings
- Very good bonding properties – Liftings are virtually impossible
- For “Switch-over clients” from Acrylic to Gel
- Very easy application
- Self-levelling
- Extremely economical usage

**Complementary product recommendations:**

- Super Shine Finish Cleaner 100 ml
- Cleaner 100 ml
- Cleaner Extra Dry 100 ml
- Buffer and Polish Block, white
- Exchangeable file PROFIL PINK
- Protech Files
- Sealant (clear) 15 ml
- Ultra Shine 15 ml

**POS Material**

- Detailed product description
- PR-Text, print material and detailed Marketing Sheet available

**Unit sizes**

- AFO – Nail Foundation 10 ml
- AFO – Bonding Gel 10 ml
- AFO – Building Gel 15 ml, 40 ml
