

Mykosept

Mykosept nourishes and protects with the AM-Factor contained.

Mykosept

Mykosept from LCN is extremely well suitable for the application after a visit to the public swimming pool or a visit to the Sauna as well as after your daily shower. Due to the AM-Factor it contains this highly effective foot care product protects the areas in between toes as well as toe nails. At the same time active ingredients like Bisabolol and Panthenol nourish the skin optimally.

For a convenient and fast application Mykosept is not only available as a dropper bottle but also as a Spray.
