

**LAQISH – NEXT GENERATION PEDICURE POLISH**

The light curing nail polish especially developed for fast pedicures. Now brand new – LAQISH with added Pirocton-Olamin.

---

## LAQISH – NEXT GENERATION PEDICURE POLISH

LAQISH is an innovative light curing nail polish which was especially developed for fast manicures and pedicures. This system is so easy in its application that your clients could polish their nails themselves in a very professional way. Due to its fast and easy application LAQISH is perfectly suitable for Nail Techs, Hairdressers and Beauticians who are interested to extend their services without any effort, big investments or training. This new system which lasts up to 10 days can be removed with easy steps.

---

### Product recommendation / Use

- For fast polish application
- Colour and protection in one product
- For clients with no time
- For long lasting colour applications

### Product description

Bonding – Colour – Sealing in one product. Get to know LAQISH now – a perfect combination of Nail Polish and UV-Colour Polish. Neither Bonder nor Sealant necessary and no dispersion layer! Just one product for a brilliant colour result!

### Ingredients and effect

LAQISH Pedicure Polish contains the active ingredient Piroctone-Olamin. The ingredient Piroctone-Olamin exhibits not only fungicidal but also antibacterial effects against bacteria.

### Application

**Step 1:** File nail into shape and degrease with the LCN Nail Prep (Art.-No.: 21071) (buff lightly first if necessary).

**Step 2:** Apply a thin layer of LAQISH colour and cure (60 seconds LED or 2 minutes UV).

**Step 3:** Repeat Step 2.

Finished – Just a short wait and the surface of the nail can be touched.

### Removal

**Step 1:** Soak the LCN Remover Wraps (Art-No.: 21313) with LAQISH Remover and wrap them around each finger. Place the LCN Remover Wrap underneath the finger in order to place the edge of the pad below the tip of the nail.

Now wrap the cottonpad of the Remover Wrap across the nail from both sides.

**Step 2:** Leave the LCN Remover Wraps for 10 minutes to soak.

**Step 3:** Pull the LCN Remover Wraps with a circular motion off each finger. Carefully push any remaining product with the LCN Removal Tool (Art.-No.: 21285) off the nail.

Finished – Afterwards treat the nail plate with an LCN Nail Care product. Alternatively the polish can be removed, after Step 2, carefully with a Buffer.

### Sales arguments

- Easy and fast application: Apply, Cure, Get up (ready to go)
- Bonding, Colour and Sealant in one
- No Dispersion layer
- As a pedicure polish it lasts up to 4 weeks
- Immediately dry
- No discolouration of the nail plate
- Made in Germany
