Fiber Tech milky white: Di-HEMA Trimethylhexyl Dicarbamate, Urethane Acrylate, Hydroxypropyl Methacrylate, Bis Phosphate, Silica Dimethyl Silylate, Tripropylene Glycol Diacrylate, Calcium Aluminum Borosilicate, Methyl Benzoylformate, CI 77891, Glycerin, Benzaldehyde, Benzoic Acid, Silica, Hectorite, CI 60725, p-Hydroxyanisole

Area of application

UV-Gel for strengthening and to repair long natural nails as well as for especially thin overlays and refills

Special highlights and sales arguments

Combines bonding and sculpting properties; contains transparent fibre glass particles; high pressure resistance; very good sculpting properties; suitable for paperform extensions; can be applied in thin layers; liftings are virtually impossible; especially suitable for normal and strong nails; 100% Vegan; Made in Germany;

Assortment

Available in 2 sizes and 3 colours

Availability

Immediately (Standard range)

Application

Apply FiberTech onto natural nails (if needed after the application of a paperform). A LCN bonding agent can be applied (f.e. Bonder Intense) depending on the nail type. Now the normal sculpting application can continue.
